ATHARV RAJENDRA BHOSALE

+91 9004160207 | atharvbhosale16@gmail.com | LinkedIn | Portfolio | Mumbai, India

BSc-IT graduate specializing in data engineering with hands-on experience in **Azure (ADF, Synapse, ADLS Gen2), Microsoft Fabric, SQL, and PySpark**. Skilled in building ETL pipelines, data models, and analytics-ready datasets to solve real-world business problems.

TECHNICAL SKILLS

- **Languages:** Python (OOP, Pandas), SQL (Advanced), PySpark
- **Cloud Platforms:** Azure Data Factory, Synapse Analytics, ADLS Gen2, Azure SQL, Databricks, Microsoft Fabric (OneLake, Lakehouse, Data Warehouse)
- **Data Engineering:** ETL/ELT, Medallion Architecture, Data Modeling, Dimensional Design, SCD, Metadata Management, Batch & Incremental Processing
- **Tools & BI:** Git, GitHub, Power BI

PROJECTS

UrbanMart Data Engineering Platform | Azure Data Factory, ADLS Gen2, Synapse, PySpark, Serverless SQL

- Built an end-to-end Medallion Architecture pipeline to ingest and process 540K+ retail transactions, using ADF for orchestration and Synapse PySpark for transformations.
- Cleansed and standardized raw CSV data in the Silver layer by removing exact duplicates, formatting timestamps, and filtering invalid prices while retaining net-return logic.
- Democratized data access by creating SQL views over Gold Parquet files using Synapse Serverless SQL and OPENROWSET for direct analytical querying.

E-Commerce Data Migration | Azure Synapse, ADLS Gen2, SQL Server

- Built an end-to-end Medallion Architecture pipeline in Azure Synapse, ingesting operational data into ADLS Gen2 and SQL Server.
- Developed a metadata-driven Bronze layer for dynamic processing and implemented watermark-based incremental loading using dynamic SQL.
- Engineered Silver and Gold layers using stored procedures to clean, deduplicate, and join 8 tables into an analytics-ready DimPerson dimension table.

EXPERIENCE

Wyscout Data Analyst | Hudl India Pvt. Ltd. | *Sep 2025 - Dec 2025*

- Tagged and validated match-event data for 100+ matches, maintaining 97% accuracy under tight deadlines.
- Analyzed player and match-performance data to produce structured reports for analysts and coaching staff.
- Validated, cleaned, and cross-checked high-volume sports datasets end-to-end, ensuring data integrity for reporting.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)

- - Sathaye College, Mumbai | Apr 2022 - Apr 2025

CERTIFICATIONS

- **Data Engineering** | Udemy (Oct 2025)
